FIFTY-FIFTH ANNUAL REPORT
OF THE
BOARD OF SUPERINTENDENCE
OF THE
DUBLIN HOSPITALS,
WITH
APPENDICES FOR THE YEAR 1912-13.

TO HIS EXCELLENCY THE RIGHT HON. JOHN
CAMPBELL, EARL OF ABERDEEN, K.T., G.C.M.G.,
Lord Lieutenant General and General Governor of Ireland.

35 DAWSON STREET,

1st July, 1913.

MAY IT PLEASE YOUR EXCELLENCY :

We, the Board of Superintendence of the City of Dublin Hospitals, have the honour to submit to Your Excellency this our Fifty-fifth Annual Report under Statute 19 & 20 Vict., cap. 110, passed on the 29th July, 1856, entitled *Dublin Hospitals Regulation Act*.

During the year ending 31st March, 1913, we have inspected all the Hospitals which receive grants from Parliament.

Viz. :—

1. Westmoreland Lock Hospital.
2. Stevens' Hospital.
3. Meath Hospital and County Dublin Infirmary.
4. Cork Street Fever Hospital.
5. The House of Industry Hospitals, viz. :—
 - (a) Hardwicke Fever Hospital.
 - (b) Whitworth Medical Hospital.
 - (c) Richmond Surgical Hospital.
6. Rotunda Lying-in Hospital.
7. Coombe Lying-in Hospital.
8. The Royal Victoria Eye and Ear Hospital; and
9. Royal Hospital for Incurables, which receives a portion of the Concordatum Fund.

On these occasions we carefully observed and inquired into the state and condition of each institution to ascertain that the wards were clean and well ventilated, that every provision was made for the treatment, comfort, and welfare of the patients, and that the several buildings were kept in good repair and in a sanitary condition. We made inquiries respecting the current expenses of each hospital and the system of purchasing, storing, cooking, and issuing supplies; we looked into the nursing arrangements, and into the means available in each hospital for the extinction of an outbreak of fire, and for the escape of the inmates in the event of such an occurrence, and in fact, into all such matters as might assist us in supervising these hospitals, and in reporting thereon in accordance with the provisions of the 18th section of the Act of 19 & 20 Vict., cap. 110.

In the Appendix we set forth two sets of Returns. One set tells of the work done—viz., Table No. 1 the nature of cases treated in each hospital during the year; Table No. 2 the average number of beds occupied, the average time spent under treatment by each patient, the number of deaths. The other set has reference to the economic side of the question. Table No. 3 shows for each hospital its income and the sources thereof. No. 4 sets forth in detail the chief heads of expenditure. No. 5 the average costs per bed for maintenance and for establishment and for both combined, but exclusive of buildings and furniture. No. 6 the prices for each article supplied to each hospital per contract or otherwise. There is also appended a form giving the names of the governors of each hospital and the number of their attendances during the year.

A study of these tables, taken in conjunction with what we ourselves have observed, enables us to report that the hospitals under the superintendence of this Board fulfil in an economical and thorough way the objects for which they were instituted.

Speaking generally of the Hospitals under supervision, we beg to say that all have now reached a high degree of efficiency. An excellent system prevails in each, things work smoothly, and almost automatically, and, therefore, only by endless repetition would it be possible to make, year after year, an extended report of each. We emphasise the fact that a thoroughly good understanding exists between the Board and the Managers of the various institutions it superintends, and we beg to take this opportunity of thanking them for their readiness to welcome suggestions from us on the smallest point likely to add to efficiency, and to act upon them unless reasons to the contrary can be shown.

THE WESTMORELAND LOCK HOSPITAL.

On inspection we found this Hospital in good condition. The wards, passages and basement were scrupulously clean and

well-ventilated. The bedding and the clothing of the Patients were in a satisfactory state. The scale of dietary is ample, and the various articles of food, including bread, meat, milk, butter, &c., which we examined, were, without exception, of good quality. The cooking is satisfactorily carried out, as is also the washing of soiled clothes. The patients, on being questioned, expressed themselves as well pleased with their treatment, and they looked contented. During the year the Hospital was repainted inside and out at an expense of about £500.

STEEVENS' HOSPITAL.

This institution continues to do excellent work in an old-fashioned building. Efficiency rather than ostentation is aimed at by those who have charge of it. Its work is general and wide, and amongst the many good things it does attention may be called to the number of nurses it turns out, trained both in general nursing and in midwifery, and thus fully qualified to work in rural districts. As far as we know, this is the only institution in Dublin that gives this double training. We found at our inspection every part of the Hospital in good order. We left no corner unvisited. The quality of the supplies, the cooking, the laundry, called for praise, and keeping a clear eye for all that is meant by sanitation we came away fully satisfied.

MEATH HOSPITAL AND COUNTY DUBLIN INFIRMARY.

After a very full inspection of this Hospital we have nothing to do but repeat the praise bestowed on it in former Reports. The management has been the same for some years, but as time goes on it does not abate one jot of its foresight, energy, and attention to details. The wards were scrupulously clean, the patients clean and happy-looking, sanitary arrangements unexceptional, and all that makes for well-being carefully looked to. The kitchen, the laundry, the quality of the supplies, &c., all claimed our attention with the result above expressed.

CORK STREET FEVER HOSPITAL.

We can report that this Hospital is fulfilling in an eminent degree the purpose for which it was established, and that it continues to merit the esteem and support of the public. At inspection we found the wards well-ventilated, bright and cheerful, the bedclothes clean, and systematic arrangements for their regular disinfection in force. The duties of the nursing staff were being performed with zeal and efficiency. In every department good management prevailed.

The following improvements were carried out during the past year :—

The walls of the Wards in the Epidemic House were re-plastered, a new staircase and a Waygood's lift were fitted up, and the walls of the stairs plastered in Keen's cement. The chimneys of the Epidemic and Recovery Houses were repointed and repaired.

The Laundry was remodelled, and the old Crescent Ironer has been replaced by a large "Decoudun."

The Electric installation was extended, and storage batteries put in, so that electric light is available day and night. A producer plant was also installed.

The Observation Wards in the Fever House were painted.

The hot water supply in the Nurses' Home was made more efficient by erecting a new boiler.

HOUSE OF INDUSTRY HOSPITALS.

We found these Hospitals conducted in all department with care and ability. On the day we inspected, everything was in perfect order, and we could see that it was the ordinary routine. The extensions to the Nurses' Home, referred to in last Report, are now completed at a cost of £7,966. £4,475 of this sum has been met through donations and subscriptions, leaving a balance still due of £3,491. The work has been thoughtfully designed and well carried out, and adds greatly to the efficiency of the Hospitals. Another addition has been an instalment of a complete X-ray equipment.

THE ROTUNDA LYING-IN HOSPITAL.

This institution is admirably conducted. At our inspection we felt called upon to express satisfaction at every turn, things were being so well done, there was such good management, regularity, cleanliness, and it was so plain that those in charge were fully equal to the working of the great machine of which they had hold.

During the year the following outlays were made :—

Paid balance of cost of new Labour Wards	£264	19	1
Paid on account, Improvements to Students' Quarters	-	-	-
	928	5	0
Painting in Hospital has been done to the extent of	-	-	-
	317	10	5
Plumbing in Hospital has been done to the extent of	-	-	-
	167	4	11

COOMBE LYING-IN HOSPITAL.

This Hospital continues to do a vast amount of good work on slender means. We found everything in admirable order. The cleanliness of the place and of the patients, and the air of happy contentment evident on all sides could not fail to strike any observer. We made a full inspection and were thoroughly satisfied.

During the year the following special expenditure has been undertaken :—

Hot water fittings in Maternity Wards, &c.	-	£84	0	0
Ryanite floors	-	-	74	14 10
Painting Nurses' Home	-	-	51	7 9

A complete system of Electric lighting throughout the Hospital, by which it is believed a very large saving will be effected. The cost—£259—has been donated already.

ROYAL VICTORIA EYE AND EAR HOSPITAL.

In this institution everything is new and excellent, and in perfect working order. It is a place one comes to rather to admire than inspect. The highest standards are aimed at and reached.

A new operating-room has been erected during the year, and a new wing, which will give an addition of 20 beds, is in course of construction.

ROYAL HOSPITAL FOR INCURABLES.

This institution goes its beneficent way with increasing usefulness. A most thorough inspection of every part and detail filled us with the satisfaction that springs from looking at really good work turned to the most useful ends. It was with pleasure we learned of extensive additions about to be made, and we beg to bring them to the notice of the charitable public. It seems that for some time past the Board have had under consideration the out-of-date and inadequate condition of the oldest portion of the Hospital—the Male side—where there are at present no Ward Kitchens, and the Bath-room and Lavatory accommodation is insufficient. To remedy these defects, and at the same time increase the usefulness of the institution, the Board have decided to build two new wings to the Hospital, containing in all 70 beds. To absorb Wards 1, 3, and 5 (containing 35 beds in all), and utilise the space occupied by these wards for new Bath-rooms, Lavatories, Ward Kitchens, and Sanitary Annexes; to build a new Billiard-room on the ground floor, and a Day-room on the first floor; to provide a new Sisters' Sitting-room, Sick Nurses' room, Blanket and Linen Store; to build a new Board-room, the existing room being altogether too small to accommodate the large number of Governors who now attend the various meetings for the election

of patients. NOTE.—The Board of the Hospital is now represented by over 600 Governors.

The *present* bed accommodation is as follows :—

Male patients	-	-	-	88	beds
Female patients	-	-	-	125	„
Total				<u>213</u>	„

When additions and alterations are complete above figures will read :—

Male patients	-	-	-	101	beds
Female patients	-	-	-	147	„
Total				<u>248</u>	„

That the additions above referred to are urgently required is borne out by the following figures :—

173 candidates applied for admission to the Hospital during the past year (all afflicted with incurable diseases, and eminently deserving of admission to the Hospital), and but 46 were elected.

We have the honour to be

Your Excellency's obedient, faithful servants,

JOHN E. BARRY, KNT., *Chairman*.
 ARDILAUN.
 LAMBERT H. ORMSBY, KNT.
 CHARLES E. LAMBKIN.
 JOHN MAGEE FINNY, M.D.
 JAMES INGLIS, J.P.
 WILLIAM F. COTTON, D.L., J.P.
 JOHN LENTAIGNE, KNT.
 JOSEPH F. O'CARROLL, M.D.
 AMBROSE KELLY.
 ANNE M. McDONNELL.
 MARGARET McNEILL.

R. F. TOBIN, *Secretary*.

APPENDIX.

TABLE No. 1.

A CLASSIFIED RETURN of the DISEASES of Patients treated in each of the Hospitals under the Superintendence of the Board; of the number of such Patients affected with, and of the number that died of, any particular Disease during the year ended 31st March, 1913.
